$\nabla p'$

1) $\Delta c \mid \Delta v'$

$d' = s' - p'$

$s' = \frac{S}{V}$

$p' = \frac{S}{K}$

$K = C + V$

CM'

$s' \longrightarrow p'$

production of surplus value

$S : \{\text{valorized capital}\}$

MCM'

$\Delta \in \mid \nabla p'$, $s' \Longrightarrow p'$ $\quad \frac{S}{V} \Longrightarrow \frac{S}{K}$ $\quad VKK$ $\quad S > p'$:

"autovalorization"

i) $s' = p'$, $C = 0$

$V = 0$? NO : (F) $V > 0$,

"always certain amount of labor is required to operate certain amount of machinery, equipment and raw materials in the production of every commodity."

$P : \{\text{valorized capital}\}$

$P : \{I, r, Pe\}$

$Pe : \{K, I \sim K\}$
